1. Study any Quizlets made for chapter 10.
2. Know the aids to understanding words.
3. How does saliva enhance the taste of food?
4. List the order of parts that light passes as it enters the eye.
5. Match eye muscles with their functions.
6. Match the five main sensory receptors with descriptions or stimulus.
7. Primary taste sensations and location.
8. Know/Apply the following terms:
 - Accommodation
 - Acute pain
 - Auditory nerve pathways
 - Auditory ossicles
 - Blindness
 - Cataract
 - Chemoreceptors
 - Chronic pain
 - Ciliary muscles
 - Conductive deafness
 - Enkephalins
 - Floaters
 - Fovea centralis
 - Free nerve endings
 - Glaucoma
 - Inner tunic
 - Meissner's corpuscles
 - Night blindness
 - Olfactory receptor cells
 - Organ of Corti
 - Pacinian corpuscles
 - Pain receptors
 - Referred pain
 - Retina
 - Rhodopsin
 - Sensory adaptation
 - Serotonin
 - Somatic senses
 - Special senses
 - Stapes
 - Taste receptors
 - Vitreous humor
