

Anatomy Study Guide

Chapter 5 – Tissues

1. Study any Quizlets made for chapter 5.
2. Know the aids to understanding words.
3. Know Tables 5.1 – 5.6 and be able to answer questions on functions, locations, examples, and distinguishing characteristics.
4. Look at notes for the “hints” of essays.
5. Know/Apply the following terms:
 - Basement membrane
 - Cardiac muscle
 - Chondrocytes
 - Cutaneous membrane
 - Elastic cartilage
 - Endocrine gland
 - Exocrine gland
 - Fibrocartilage
 - Hyaline cartilage
 - Lacunae
 - Matrix
 - Mucous membrane
 - Neuron
 - Osteocytes
 - Pseudostratified
 - Serous membrane
 - Simple columnar
 - Simple cuboidal
 - Simple squamous
 - Skeletal muscle
 - Smooth muscle
 - Stratified squamous
 - Synovial membrane
 - Tissue
 - Transitional epithelium
