

Anatomy Study Guide

Chapter 6 – The Skin and the Integumentary System

1. Study any Quizlets made for chapter 6.
2. Know the aids to understanding words.
3. Compare and contrast the three types of burns.
4. Explain the tissue response to inflammation.
5. Fully explain the layers of the skin: location, tissue type, structure, etc.
6. How does a hair form?
7. How does one prevent ulcer formation?
8. How/Why does the body regulate temperature?
9. What are the general functions of the skin?
10. What factors determine the color of the skin?
11. What gland is involved with acne?
12. Know/Apply the following terms:
 - Apocrine glands
 - Arrector pili muscle
 - Deep partial-thickness burn
 - Dermal papilla
 - Dermis
 - Eccrine glands
 - Epidermis
 - First degree burn
 - Full-thickness burn
 - Hypodermis
 - Melanin
 - Melanin granules
 - Scar
 - Sebaceous glands
 - Second degree burn
 - Stratum basale
 - Stratum corneum
 - Stratum granulosum
 - Stratum lucidum
 - Stratum spinosum
 - Subcutaneous layer
 - Superficial partial-thickness burn
 - Third degree burn
 - Vitamin D
